

Scouts UK Compliance Dashboard

User Guide — v1.99 | Winchester District Scouts

Overview

The Scouts Compliance Dashboard is a standalone HTML file that helps District Leadership Volunteers (DLVs), Group Lead Volunteers (GLVs), and District teams track membership compliance across units. It works alongside David Breakwell's Tampermonkey script for the Scouts Digital membership system.

No installation, login, or internet connection is required — simply open the HTML file in any modern web browser.

Privacy: All data processing happens locally in your browser. No personal data is transmitted to any server at any point. The tool processes data you already have lawful access to via the Scout Membership System.

Getting Started

Step 1 — Install the Tampermonkey Script

- Install Tampermonkey in your browser (Chrome, Firefox, Edge, or Safari).
- Navigate to the Tampermonkey dashboard and install David Breakwell's Scouts Membership System UK Tweaks script.
- Log in to <https://membership.scouts.org.uk> as normal.

Step 2 — Recommended Tampermonkey Settings

The dashboard expects specific columns to be present in the data. For best results use the settings shown below when running the Role Report:

Unit	11th AnyTown%	Start At	Organisation	Run Report	Refresh Display	Criteria:	🏠	🔄
☒ Use Data Explorer data ☒ Role Report ☐ Vacancy Report								
Run Status								
Enter Unit Name above (can include % wildcard) and run report								
Additional Criteria								
☐ Include Roles for matching Unit Only ☐ Exact Match ☐								
First Name Filter Last Name Filter Team Filter								
Welcome								
☐ Exclude Role Audit ☐ Only show volunteers with missing audit items								
Learning								
☒ Show Detailed learning ☒ Show Expiry Dates ☒ Show Days to Expiry ☐ Read each course separately								
Disclosures								
☒ Show DBS Information ☒ Show DBS Status ☐ Alternative Method								
Display Options								
☒ Show Membership Number ☐ Use Color ☐ Exclude Helpers/Holding Roles ☒ Exclude Closed Roles								

Tampermonkey Role Report — recommended settings for use with the Compliance Dashboard to get the maximum information.

Setting	Value	Notes
Use Data Explorer data	ON	Must be checked
Report type	Role Report	Select Role Report (not Vacancy)
Include Roles for matching Unit Only	OFF	Leave unchecked for district-wide view
Exact Match	OFF	Use % wildcard in unit name for broader results
Exclude Role Audit	OFF	Leave unchecked unless you want to exclude this data
Only show volunteers with missing audit items	OFF	Leave unchecked unless you only want to see these members.
Show Detailed learning	ON	Required for individual module columns
Show Expiry Dates	ON	Required for expiry date columns
Show Days to Expiry	ON	Required for days-remaining columns
Read each course separately	OFF	Leave unchecked. You may get different results with this checked.
Show DBS Information	ON	Required for DBS columns
Show DBS Status	ON	Required for DBS status column
Alternative Method	OFF	Leave unchecked - this checks DBS's in a different way.
Show Membership Number	ON	Required for member identification
Use Color	OFF	Optional — does not affect dashboard
Exclude Helpers/Holding Roles	OFF	Leave unchecked — helpers are included in compliance
Exclude Closed Roles	ON	Recommended — hides inactive roles

Step 3 — Export the Data

- Navigate to the Members section of Scouts Digital for your group or district.
- The Tampermonkey script adds a compliance table to the page — wait for it to finish loading (all rows should be visible).
- Click the "Copy to Clipboard" button added by the script.

The dashboard reads both plain text and HTML clipboard formats automatically. When the HTML format is available (which it is when copying from Scouts Digital with the Tampermonkey script active), member names become clickable links directly to their SMS profile.

Step 4 — Load the Dashboard

- Open the Compliance Dashboard HTML file in your browser.
- Click inside the paste box and press Ctrl+V (Windows) or Cmd+V (Mac).
- Click Load Compliance Dashboard.
- The dashboard will build instantly.

Save Dashboard

Delete Dashboard

<!--

Alternatively you can use the open dashboard button.

For this to work you need to have pasted the Dashboard source html code into the “save dashboard” box at the bottom of the role report panel. View the source code in your browser. Copy all and then paste into the box.

You only need to do this once as the behaviour persists between sessions.

Importing and Exporting Data

The dashboard supports three ways to get data in and out, each suited to different use cases.

Paste Your Compliance Data

Run David Breakwell's Tampermonkey script on the Scouts membership site, click Copy to Clipboard, then paste below.

PASTE CLIPBOARD DATA HERE

Click inside the box above and press **Ctrl+V / Cmd+V** — or drag and drop a **.tsv** file anywhere on this box.

 Data entered here is processed locally in your browser and is not transmitted to any server.

 Import Data file...

 Import TSV file...

RECENT:

11th Winchester (Fulford) — 17 May 2026 ×

Load Compliance Dashboard →

Paste from Clipboard (Primary method)

Copy directly from Scouts Digital using the Tampermonkey script and paste into the dashboard. This is the primary method and provides the richest data including clickable member profile links and will be the most up to date data set from the Scout Membership System.

Export Data / Import Data (Recommended for sharing)

The Data export/import workflow is the recommended way to share filtered data with colleagues whilst preserving member profile links.

Export Data

- Click ↓ Export Data in the filter bar.
- The dashboard exports the currently filtered data as a self-contained HTML file.
- Member names are exported as clickable hyperlinks to their SMS profile (where available).
- The file is human-readable in any browser and can also be opened in Excel or Google Sheets.

Import Data

- Click 📁 Import Data file... on the paste screen.
- Select the HTML file previously exported from this dashboard.
- The dashboard reads the file directly — no copy/paste needed.
- Member profile links are fully preserved and remain clickable.

GDPR consideration: Filtering before exporting is an important data protection practice. For example, a District team can filter results to a single Group and send only that Group's data to their GLV — rather than sharing the entire district dataset which would include personal data about members in other Groups. Similarly, a GLV can filter to a single section before sharing with a section leader. This is consistent with the principle of data minimisation under UK GDPR.

Suggested sharing workflows:

| Who is sharing | Recommended workflow |
|--------------------------------|--|
| District team → GLV | Filter by Group on Unit Summary tab, export Data, send file to GLV |
| District team → Section Leader | Filter by specific section, export Data, send file to section leader |
| GLV → Section Leader | Filter by section, export Data, send file |
| DLV → District team member | Export Data of full district view for review |

Export TSV (For Excel / Google Sheets)

- Click ↓ Export TSV in the filter bar.
- Exports the currently filtered and visible data as a tab-separated values file.
- Compatible with Excel, Google Sheets, and other spreadsheet tools.
- Collapsed column groups are excluded from the export.
- A Profile URL column appears as the last column, containing the SMS member profile link where available. This can be used to create HYPERLINK() formulas in Excel if needed.
- Note: TSV files do not preserve clickable name links. Use Export Data for dashboard-to-dashboard sharing.

Import TSV

- Click  Import TSV file... on the paste screen.
- Select a .tsv file previously exported from this dashboard.
- Data loads as normal but member profile links are not preserved.
- Use Import Data instead if you need to retain clickable member links.

Dashboard Layout

Top Bar

The top bar shows the group/district name detected from your data, the data timestamp (when it was first loaded), and a ⚠ Stale warning if the data is more than 7 days old.

Buttons on the right: ☀ Light / 🌙 Dark theme toggle, and ← Load new data.

Tabs

| Tab | What it shows |
|--|---|
|  Members | Full detail table — one row per member role, all compliance columns, filter bar, and email draft tool |
|  Unit Summary | Visual cards grouped by Scout Group — use for a quick overview of which units need attention |
|  District Roll-up | One row per Scout Group with aggregated compliance stats — ideal for a DC overview |

The Members Tab

Filter Bar

Row 1 — Filters (can be combined in any combination):

| Filter | Description |
|--|--|
|  Name | Live text search on member name |
| All roles | Filter by role. Supports select all / deselect all / indeterminate states |
| All units | Filter by unit or section |
| All teams | Filter by team. Supports select all / deselect all / indeterminate states |
| All statuses | Filter by membership status (Full, Provisional, etc.). Supports select all / deselect all / indeterminate states |
| All compliance | Filter by compliance state |

| Filter | Description |
|------------------|--|
| Show issues only | Instantly hides all fully compliant rows |

Row 2 — Actions:

| Button | Description |
|--------------------------------|--|
| ☐ Print | Print or save as PDF |
| Draft email | Generate a personalised reminder email for selected members |
| Copy emails | Copy all filtered member email addresses to clipboard (comma-separated, ready to paste into Gmail BCC) |
| ↓ Export Data | Export filtered data as HTML preserving member profile links — recommended for sharing |
| ↓ Export TSV | Export filtered data as tab-separated values for Excel/Sheets |
| Sort by urgency | Sort by most urgent upcoming expiry across all modules |
| N members | Count of currently filtered members (unique people) |

Select / Deselect All Checkboxes

The checkbox column in the Members table has a master checkbox in the header row that controls all visible rows:

- Checked — all filtered rows are selected
- Indeterminate (dash) — some rows selected, some not
- Unchecked — nothing selected

The same three-state behaviour applies to the All roles, All teams, and All statuses filter dropdowns.

Summary Statistics

| ▼ SUMMARY STATISTICS — CLICK A BOX TO FILTER | | | | | | | | | |
|--|-------------------------------------|-------------------------------------|-------------------------------------|-----------------------------------|--------------------------------|-------------------------------|----------------------------------|----------------------------|--------------------------------------|
| 135
UNIQUE MEMBERS | 65
48%
FULLY COMPLIANT | 1
1%
EXPIRING <30 DAYS | 6
4%
EXPIRING <90 DAYS | 67
50%
ACTION NEEDED | 2
1%
DBS <90 DAYS | 2
1%
DBS EXPIRED | 4
3%
SAFEGUARDING X | 5
4%
SAFETY X | 35
26%
FIRST RESPONSE X |

A collapsible row of stat boxes beneath the top bar on the Members tab. Each box is clickable to filter the table to that group.

| Stat | Meaning |
|-------------------|---|
| Unique Members | Total distinct people (not rows) |
| Fully Compliant | People with no missing or expiring items |
| Expiring <30 Days | People with at least one item expiring within 30 days |
| Expiring <90 Days | People with at least one item expiring within 90 days |
| Action Needed | People with at least one missing item or expired DBS |
| DBS <90 Days | People whose DBS is within 90 days of expiry or already expired |
| DBS Expired | People with an expired DBS |
| Safeguarding X | People with missing Safeguarding training |
| Safety X | People with missing Safety training |

| Stat | Meaning |
|------------------|---|
| First Response X | People with missing First Response training |

Note: Statistics are always based on unique people. A person's worst-case compliance across all their roles is used.

Column Groups

| MEMBER & ROLE INFO | | | | | | | |
|-------------------------------|---------|-------|------|------|------|--------|------------|
| ☐ Name | Mem No. | Email | Role | Unit | Team | Status | Start Date |

Column headers are organised into colour-coded collapsible groups. Click the coloured band at the top to collapse/expand a group.

| Group (colour) | Columns |
|-----------------------------|---|
| Member & Role Info (cyan) | Email, Role, Unit, Team, Status, Start Date, Days in Role |
| Welcome Activities (purple) | Disclosure, Declaration, Profile, References, CE Check, Welcome Conv., Growing Roots, Trustee Check |
| Critical Modules (red) | Safeguarding + expiry, Safety + expiry, First Response + expiry |
| Learning Modules (amber) | Who We Are, Creating Inclusion, Data Protection, Programme, Leading Vols, Trustee Module |
| DBS (green) | DBS status, expiry date, days remaining, DBS status text |

Cell Symbols and Row Colours

| Symbol | Meaning |
|--------|---|
| ✓ | Complete |
| ✗ | Missing or not complete (red background) |
| ⚡ | Expiring within 90 days (amber background) |
| ✓ | Not required for this role — excluded from compliance calculation |

| Row colour | Meaning |
|-------------------|--|
| Red left border | Member has one or more missing items or an expired DBS |
| Amber left border | Member has items expiring within 90 days, but no hard issues |
| Green left border | Member is fully compliant |

Email Features

| | | | | | |
|-------|-------------------|-------------|-------------|------------|-----------------|
| Print | Draft email (135) | Copy emails | Export Data | Export TSV | Sort by urgency |
|-------|-------------------|-------------|-------------|------------|-----------------|

Copy Emails

Click Copy emails in the filter bar to copy all filtered member email addresses as a comma-separated list, ready to paste directly into Gmail's To or BCC field. Apply filters first to target a specific group, section, or compliance state.

Draft Email Generator

Generates personalised reminder emails for selected members with outstanding compliance items.

1. Tick the checkbox on the left of each row for the members you want to contact. Use the header checkbox to select all visible rows at once.
2. The  Draft email (N) button appears in the filter bar showing the count of selected members.
3. Click  Draft email to open the email generator.
4. Review the member list, edit the subject line if needed, then click  Copy to clipboard and paste into your email client.

The email lists each selected person's outstanding items specifically — missing modules, expiring certifications with exact day counts, and expired DBS.

Unit Summary Tab

Shows all units as clickable cards, grouped by Scout Group. Designed for a fast visual overview.

Group Card Colours

- Green tint — group is $\geq 80\%$ compliant overall
- Amber tint — group is 50–79% compliant
- Red tint — group is below 50% compliant

Clicking Cards

- Click a group header card — filters the Members tab to all members in that group, then switches to the Members tab automatically.
- Click a unit card — filters the Members tab to that specific section only.
- Click the same card again (or use the clear pill) — clears the filter.

District Roll-up Tab

The screenshot shows the 'District Roll-up' tab with a navigation bar at the top containing 'Members', 'Unit Summary', and 'District Roll-up' (active). The table below displays compliance data for various Scout Groups, including the number of members, roles, compliance percentage, issues, expiring items, DBS issues, and safeguarding status.

| Group | Members | ROLES | Compliance | Issues | Expiring | DBS Issues | Safeguarding |
|-------|---------|-------|------------|-----------|------------|------------|--------------|
| 4 | | | 25% | 3 ISSUES | | | |
| 135 | | | 50% | 44 ISSUES | 5 EXPIRING | 3 | 8 |
| 2 | | | 50% | | 1 EXPIRING | | |
| 42 | | | 57% | 13 ISSUES | 6 EXPIRING | 6 | |

One row per Scout Group showing aggregated compliance stats. Useful for a DC or ADC to quickly identify which groups need the most support. Click any column header to sort.

Saved Snapshots

Every time you load new data, the dashboard automatically saves a snapshot to your browser's local storage. The snapshot label shows the date the data was first loaded — this date never changes even if you reload the same snapshot later.

- Up to 3 recent snapshots are stored per browser/device.
- On the paste screen, recent snapshots appear as clickable chips above the Load button.
- Click a chip to instantly restore that dataset.
- Click the × on a chip to delete a snapshot.
- Snapshots older than 7 days are automatically purged when the dashboard opens.

⚠ Snapshots are stored in browser local storage and are specific to the browser and device. They are not shared between computers and will be cleared if you clear your browser data.

Keyboard Shortcuts

| Key | Action |
|--------|---|
| Esc | Clear all active filters and reset view |
| / or F | Focus the name search box |
| I | Toggle "Show issues only" on/off |
| D | Toggle between dark and light mode |
| U | Sort table by urgency (most critical first) |
| P | Open print dialog |
| ? | Show / hide keyboard shortcuts reference |

How Compliance is Calculated

Unique People

Some members hold multiple roles and appear on more than one row. All statistics are based on unique people identified by membership number. A person's worst-case compliance across all their roles is used.

Role-aware Modules

The ✓ symbol means a module is not required for that person's role. These are excluded from all compliance calculations.

Action Needed vs Expiring

- "Action Needed" means at least one item is completely missing (✗) or a DBS has expired.

- "Expiring Soon" means at least one item is within 90 days of expiry.
- A person can appear in both counts simultaneously as they are separate concerns.

Troubleshooting

| Problem | Solution |
|---------------------------------------|--|
| Nothing happens after clicking Load | Make sure you have pasted data in the box. Try copying again from Scouts Digital — ensure the full table has loaded before copying. |
| "Could not find column headers" error | The Tampermonkey script may not have finished loading. Wait for all rows to appear before copying. |
| No member profile links | Profile links are only embedded when copying from Scouts Digital with the Tampermonkey script active. Plain text pastes will not have links. |
| Stats seem lower than expected | Stats count unique people. A group with 30 rows may have fewer unique members if some hold multiple roles. |
| Data import not working | Ensure the file was exported from this dashboard using Export Data. Files from other sources may not be compatible. |
| Snapshots not appearing | Snapshots use browser local storage. Check that your browser has local storage enabled and has not been cleared. |
| "Stale" warning appears | The data is more than 7 days old. Re-export from Scouts Digital for current information. |

🔒 Data Protection: This dashboard is a standalone tool and does not connect to Scouts Digital or any other system. All processing happens locally in your browser. No data is transmitted anywhere. Owner: Nick Elborough, District Lead Volunteer | nelborough@gmail.com Winchester District Scouts (S10001168) Built to support UK Scouts compliance monitoring. Compatible with all modern browsers.
